

VIRTUAL CISO SERVICES

Enterprise-grade security leadership — without the enterprise price tag.

Strategic cybersecurity guidance, compliance expertise, and executive-level risk management tailored to your organization's unique needs and growth trajectory. Choose from three service offerings to meet your cybersecurity and budget needs.

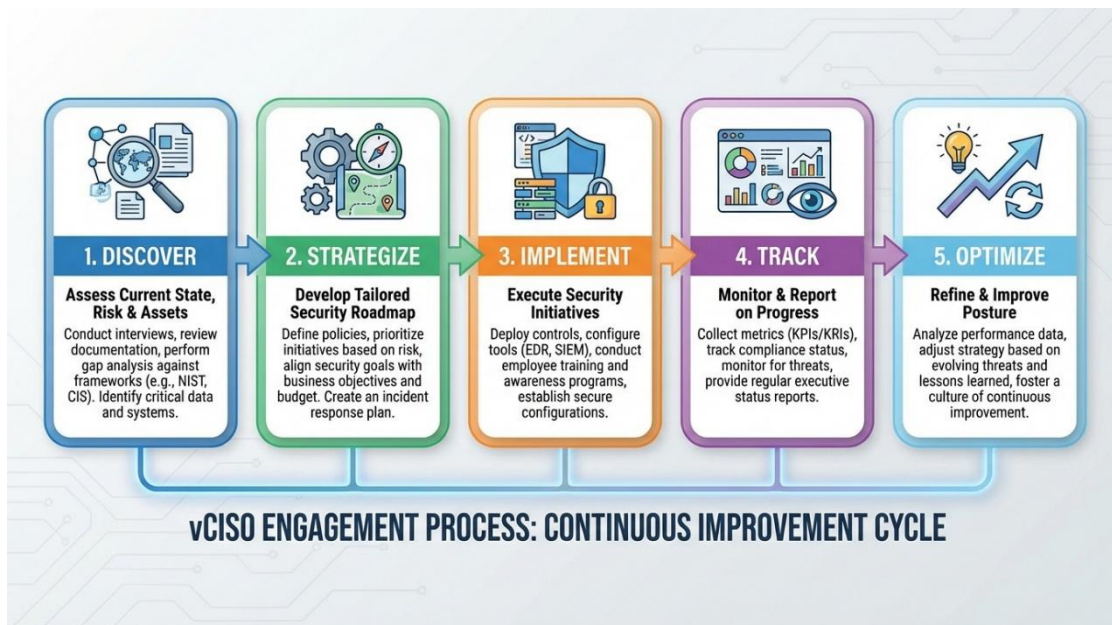

Why a Virtual CISO?

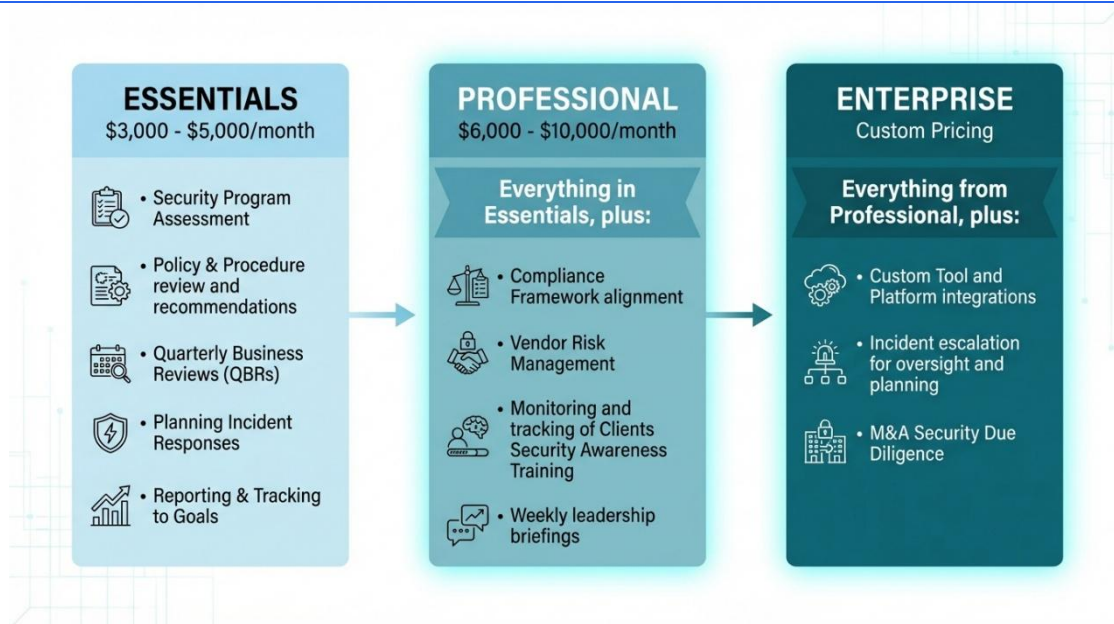

The cybersecurity landscape is evolving faster than most organizations can keep pace with. A full-time CISO commands \$300K-\$600K+ in total compensation — yet many mid-market companies need the same caliber of strategic guidance.

Hyperhaze's vCISO service bridges that gap by delivering seasoned security leadership on a fractional basis. You get a dedicated security executive who understands your business, engages your board, and drives measurable risk reduction — at a fraction of the cost.

WHAT YOU GET

- ✓ Dedicated security executive aligned to your goals
- ✓ Risk assessment & strategic security roadmap
- ✓ Policy development & compliance alignment
- ✓ Board & executive security reporting
- ✓ Vendor & third-party risk management
- ✓ Security awareness & culture development support

Compliance Frameworks We Support

NIST CSF / 800-171	CMMC 2.0	SOC 2 Type II	ISO 27001
HIPAA / HITECH	PCI DSS 4.0	FedRAMP	State Privacy Laws

Industries We Serve

- Healthcare & Life Sciences
- Technology & SaaS
- Casino and Gaming
- Professional Services
- Manufacturing & Supply Chain

Why HyperHaze?

HyperHaze combines deep technical expertise with executive-level business acumen. Our consultants hold CMMC CCA/CCP & CISSP certifications, bring Senior Leadership Team experience from global technology organizations, and have hands-on experience designing and implementing security programs across regulated industries.

We don't just write policies — we design security programs that work. From boardroom presentations to goal tracking, our vCISO service is designed to deliver measurable outcomes aligned with your business objectives.
